

A skid-mounted, horizontal cooler used in a variety of applications: gas compression, lube oil cooling, process cooling and more.

Model H Specifications

- Fan diameters from 24" to 144".
- Single- and multi-fan configurations.
- Forced or induced draft.
- Electric motor or hydraulic drive configuration.
- Typical compression HP: 2,000.

Model H Advantages

- Structural strength.
- Skid-mounted for a variety of site conditions.
- Adaptable to a variety of fan drive types.
- Drives can be mounted to the internal substructure for a lower profile.
- Convenient accessibility to all components: fan, drive and bearings.

Model H

84-H

Plenum-mounted electric drive on Model HR (standard)

Optional warm air recirculation system

84-H with optional manually operated main louvers and additional heating coil

Model 2H

Optional Features

- Cooler finish per customer specifications, including tint-to-match paint and galvanizing.
- Multi-speed drives or auto variable fans can provide superior degree of temperature control.
- Louvers (manual or automated) downstream of the cooling sections to control air flow for temperature control.
- Auxiliary louvers (manual or automated) located upstream of the cooling sections to provide additional protection in cold weather climates.
- Warm air recirculation systems available over the end or side of the unit to better control process outlet temperature in cold weather climates.
- Hailguard over cooling sections, independent or integral with shutters, to protect cooling sections.
- Low noise emission fans.
- Bug screens / lint screens over air intake to minimize external fouling of cooling sections.
